Ideation Phase

PROBLEM STATEMENT

I am	I'm trying to	But	Because	Which makes me feel
Virtual Eye- Lifeguard for swimming Pool to detect active drowning. (Additional tool)	To detect people in underwater situation save their lives from drowning.	I need to understand and study the body movement patterns & connecting cameras to (AI) systems Which can devise an underwater Safety system.	Swimming pools are found everywhere now a days. Beginners, especially (childrens , young adults) often feel it difficult to breathe underwater which causes breathing trouble & lead to drowning accident.	To overcome this conflict, a meticulous system is to be implemented along the swimming pools to save human life.
